

Gase-Halls Mills,
Investigation-DeM.

105,1502

DEM/REINHARDT

On October 30th, 1922. Spoke to Mr. Sidney Carpenter about putting a man to work in the International Motor Works. In the evening had a call from Sweeney that he wanted to see me.

On October 31st, 1922. Spoke to Barbara and Louise but got no information that would help me solve the case.

Learned that Fred Reinhardt was not working on Sept. 14th, 15th, and 16th, but they were not sure, whether he worked on Monday or Tuesday. Then made arrangements for the purpose of having one of my operatives apply for a job and was also informed by Sidney Carpenter that Doctor Smith told him Mrs. Mills had three bullet wounds in her head going straight through on a line and cannot find powder marks because of decomposition. That the bodies were not mutilated. One of the bullets was on the forehead and it was on the left side of the ~~face~~. Another went in about four inches over the right ear taking a downwards course and coming out on the base of the skull of the left side. Her throat showed two cuts left to right, and only four inches of skin held it together.

On November 5th, 1922. To Bayonne New Jersey seeking information concerning Mrs. Gibson and her family.

On November 6th, 1922. To Bayonne New Jersey seeking information concerning Mrs. Gibson and her family.
